Nathan Gilman

Orlando, FL • (407) 405-0291 • ngilman@ufl.edu • github.com/npgilman • www.linkedin.com/in/npgilman

Education

BS in Computer Science **GPA: 4.0**
May 2025

University of Florida – Gainesville, Florida
Relevant Coursework: Data Structures and Algorithms, Discrete Structures, Calculus I, II, & III, Linear Algebra

Experience

Lockheed Martin – Software Engineer Intern (Orlando, FL) **May 2022 – August 2022**

- Created 20 components and systems based on outlined requirements using the Entity Component System architecture
- Developed graphical interfaces for simulation controls
- Debugged animation related issues in Unreal Engine 5 using Visual Studio
- Learned and utilized Agile Methodologies to consistently meet task objectives

Dignitas Technologies – Software Engineer Intern (Orlando, FL) **January 2021 – August 2021**

- Created, ran, and documented Unit Tests using JUnit 5
- Created frontend user-interface elements using Google Web Toolkit
- Parsed through CSV files to record and visualize data
- Downloaded and uploaded files between browser and local machine using Servlets
- Used Eclipse IDE to debug several issues

Projects

City Visualization – Creator

- Built a Python application to parse a CSV file of 30,000 cities in the United States and display the city density in the state specified by the user, saving results to disk for later viewing.
- Utilized JSON parsing and python's Turtle API to plot the cities for each state. Learned file conversion between EPS and PNG files, as well as saving to local disk via python.

Financial Analysis – Creator

- Created a Java application to read data from Yahoo Finance and display user-specified stocks over a specified timeframe.
- Utilized basic JFrame functionality, API calls to Yahoo finance and basic data visualization to get and transform stock data into a usable format.

Skills

Technical
Visual Studio / Eclipse IDE
Version Control (Git / Gitlab)
Workflow Management (JIRA / Confluence)
Unit Testing
Certified by the National Center for Simulation

Languages
C++, C, Java, Python
HTML, CSS, Javascript
SQL
